Finding Nemo @Nemo_is_NoOne · Aug 27, 2022

For those who would like to make sense of the recent insider purchases, let's read some history.

From nytimes.com

Quintessential Capital Managem @QCMFun · Aug 28, 2022

Almost every fraud busted by QCM has seen insider purchases shortly before the bitter end. Another notable example is Wirecard \$WDI, where fraudsters Marcus Braun was a huge buyer. Now he rots in jail where he belongs.

There are multiple reasons. In my experience, fraudsters understand that the market may gauge the validity of fraud allegations based on stock price performance. By keeping SP as high as possible they hope investors will shrug and forget about the shorts.

It doesn't take much brain power to now be very bearish on Amyloid plays...that is evident already- no one is paying for it. Not the US govt, not private hospitals. There's nothing novel in Adrian's supposed bearishness on Amyloid beta ..

I'm not going to make it easy for you. You need to understand the various kinds of amyloid in the disease pathology.... That's the difference between [\\$SAVA](#) and all these other clueless amyloid-beta companies. You need to find out yourself.

Good try fella... again,there are various 'states' of amyloid. You don't understand that. Secondly, if you understand the pathology of the disease, you would know that the placebo-effect risk is negligible in the OL data released.and....

1 1

MaxTweets @Maxolulbikunle · Aug 28, 2022 ...
They already have placebo-controlled biomarker data - even though that is only for 28-days, that data was essentially complemented by the 6-month OL biomarker data. See, the tea leaf work here is tying things together , which is impossible if you're a short!

Lol.. I'll give you a hint... there's solid amyloid, there's also circulating amyloid. Do your research to find out the difference. I don't know why stop at 18 instead of 56, but that's an executive decision. It has no bearing on the result.

1

MaxTweets @Maxolulbikunle · Aug 28, 2022 ...
The result was still stellar at 28. And knowing they're a small company at that time, they may have been trying to be more efficient with the \$\$ from the NIH... and expecting to move forward with the OL extension and use the money for that instead..

Let's review this humanly impossible BM correlation among placebo. Guess Wang didn't learn human physiology and human biochemistry. Oh, I forgot about the viability of the frozen dead brain tissue, someone has to help me with that one, @jesse_brodkin?

Jesse brodkin @jesse_brodkin · Aug 28, 2022
No biology experiment (ever) shows 0.97 correlation between biochemical measures, much less a dozen that are overall unchanged. This graph alone is proof-positive of data manipulation of clinical trial data by \$sava and Wang

Jesse brodkin @jesse_brodkin · Aug 28, 2022
Here's another straight-up admission of data manipulation; first and second cohort (pills vs cherries) of patients are statistically significantly different for no reason other than an investigation of data manipulation was started between the cohort readouts \$sava

The entire basis for their drug "discovery" has been retracted. There is no non-opioid Naloxone binding site (where Simufilam supposedly binds). It started with a lie and just got out of control necessitating larger and larger lies to keep the story going \$sava

Jesse brodtkin @jesse_brodtkin · Aug 28, 2022

They've been lying for so long they have gotten sloppy. Here they got the thermodynamics backwards. If Simufilam binds AD-FilaminA with higher affinity (left curve) then that's the conformation that is increased with addition of Simufilam (i.e. causes AD) \$sava

Here they got so lazy they just moved the data in the middle of making the slide \$sava

Rush terminated all coop with Wang in 11/2021. \$SAVA discord had a discussion, someone did some digging, found Rush board held a special meeting, after internal review, board decided to end all ties, projects and clinical trials. Conveniently Discord forgot their own findings.

Magnitude of order is a difficult concept for \$SAVA
1 milliCi = 1000 microCi

(Besides the fact that Geiger counters are inappropriate for beta emitters of low activity)

The image shows two forms related to isotope use and disposal. The left form is titled 'ISOTOPE USE AND DISPOSAL RECORD' and contains a table with columns for 'Date', 'Initial', 'Amount', 'Liquid Waste', 'Solid Waste', 'Disposed', and 'Balance Remaining'. The right form is titled 'WASTE AND DISPOSAL' and contains a table with columns for 'Date', 'Initial', 'Amount', 'Liquid Waste', 'Solid Waste', 'Disposed', and 'Balance Remaining'. Red boxes highlight the 'Activity' field in the 'ISOTOPE USE AND DISPOSAL RECORD' table and the 'Initial' field in the 'WASTE AND DISPOSAL' table.
